Asset Protection

We can help design, create and further coordinate the most optimal ownership and management structure for your business and personal assets, capturing your specific situation and needs, location and family strategy, political aspects, international regulatory and tax requirements.

OUR SERVICES

Succession Planning

Together we can work with you to determine the most appropriate strategy for your family situation to transfer assets to future generations.

We can do a “stress test” on the real preparedness of your structure and team for unexpected events (death, illness, default, conflict, etc.) and understanding what to do in the “what if” situation, prepare a proper roadmap – where the assets are, what to do, where to go, and explain where and how such information shall be stored and protected.

We can work with your key management team to build the right internal processes and work effectively with you, fill gaps, explain practical nuances, break down real cases, recruit necessary people, define the right functionality, areas of responsibility and the necessary levels of delegation.

Tax Planning

We can help you understand the ins and outs of personal and corporate taxation depending on your tax status, family situation, location of key assets and sources of income, reporting, disclosure and international information exchange requirements.

We provide comprehensive support, from analyzing your personal and family situation to evaluating the political, tax, and logistical considerations of relocating or living in multiple countries.
